PROFESSIONAL SUMMARY

Software developer with a B.S. in Computer Science from Northern Arizona University. Experienced in Python, Java, C/C++ and JavaScript, and in agentic development with Claude Code, which I've used to build and test a real-time audio source-separation tool. Seeking to contribute programming expertise and analytical reasoning within a software engineering role.

EDUCATION

Northern Arizona University -
Bachelor of Science in Computer Science
Flagstaff, AZ (2021 - 2025)
Conservatory of Recording Arts and
Sciences -
Master Recording Program II
Tempe, AZ (2025 - 2026)

WORK EXPERIENCE

Web Development Intern, **Penske Media Corporation** -
Los Angeles, CA (May 2023 - August 2023)

- Built and maintained features on WordPress sites using PHP and JavaScript.
- Tracked and coordinated development work in Jira within a production web team.

Studio Intern, **Electric Lady Studios** -
New York, NY (May 2026 - August 2026)

- Assisted engineers with recording sessions for professional artists by preparing studios and equipment before sessions.
- Worked with analog consoles, patchbays, and studio signal flow while troubleshooting technical issues.

Teaching Assistant, **Northern Arizona University** -
Flagstaff, AZ (September 2022 - May 2023)

- Assisted students with course material and provided guidance during assignments and class activities.
- Communicated technical information clearly and professionally while working with students and instructional staff.

TECHNICAL SKILLS

- Programming Languages: Java, Python, C, C++
- AI Tools: Claude Code (agentic coding, code review, testing)
- Web Development: HTML, CSS, JavaScript, WordPress
- Software Engineering: Debugging, problem-solving, code analysis, technical troubleshooting
- Tools & Technology: Git, Jira

SELECTED PROJECTS

StreamerIsolate - Python, PyTorch, JavaScript - built with Claude Code

- Browser extension and Python backend that removes background music from a livestream in near-real-time using the Demucs source-separation model.
- Keeps video in sync with the processed audio by buffering encoded frames (WebCodecs) and delaying playback by the processing latency.

Portfolio Website - HTML, CSS, JavaScript - built with Claude Code

- Static site with a custom audio player, a Web Audio spectrum analyzer, and a live "now playing" card from the Last.fm API.
- Portfolio can be found at angusa1210.github.io
